

Building Health Systems Globally

Senior Technical Advisor Data Impact Program

Vital Strategies (VS), based in New York City, is an international public health organization. We develop and oversee programs to strengthen public health systems and address leading causes of morbidity and mortality, providing expertise in project implementation and management, strategic communications, epidemiology and surveillance, and other core public health capacities. Our specific programs include road safety, obesity prevention, tobacco control, and activities to strengthen public health data systems and the use of public health data to guide policy and decision-making. Activities are based in low and middle income countries and cities in Africa, Latin America, Asia and the Pacific. Please visit our website at www.vitalstrategies.org to find out more about our work.

The Position

Vital Strategies is seeking qualified candidates for the position of **Senior Technical Advisor - Data Impact Program**. This is a full-time position potentially based in New York City or Singapore. Applicants must possess a valid work permit to work in New York City or Singapore.

Vital Strategies offers competitive compensation based on prior experience and qualifications as well as comprehensive benefits in order to best support our people. Benefits we offer include: health, dental and vision insurance where Vital Strategies pays generously towards the cost of these benefits for employees and their families/domestic partner; 15 paid vacation days (rising to 20 paid vacation days from fourth year of service and 25 from seventh year onwards), 13 paid federal holidays and paid days off between the Christmas and New Year's holidays; paid sick days; retirement savings plan; commuter benefits and basic life and personal accident insurance.

Background:

Since March 2015, Vital Strategies has developed a program to support ministries of health and other public health stakeholders in low- and middle-income countries to better use data to advance public health policymaking. The Data Impact Program (DIP) is a major component of a wider initiative – the Bloomberg Philanthropies Data for Health Initiative – that aims to enhance public health data collection and use capacity in 20 low- and middle-income countries in Africa, Latin America, Asia, and the Pacific. DIP entails providing technical assistance, training, and other forms of support.

Overall Role:

The Senior Technical Advisor (STA) will have lead responsibility for providing technical assistance to participating national ministries of health and other key stakeholders. In collaboration with government stakeholders, the STA will tailor the technical assistance package to the needs and priorities of each country. Major areas of technical assistance include: developing technical capacity of ministry staff to conduct policy-relevant data analysis and advising on policies, procedures, and institutional structures to promote exemplary institutional data use. Technical assistance activities will include assessment and workplan development, consultation to ministry leadership, trainings for staff, etc. In addition, the STA will provide expertise in designing technical assistance tools to be used across the initiative and may provide support in one or more technical areas (e.g., analytic

methods, report design, etc.) broadly across the initiative. Significant on-site engagement will be required. The STA will report to the Senior Vice President for Public Health Programs, and may be based either in New York City or Singapore.

Specific Duties:

- Conduct assessments of how surveillance and other public health data is used by policymakers, program planners, communications officers, and other stakeholders in national ministries of health;
- Develop workplans, in collaboration with government partners, for data use improvement;
- Provide consultation to ministry leadership and staff;
- Develop and deliver trainings;
- Develop data dissemination products, including public data reports;
- Identify and engage nongovernmental stakeholders;
- Participate in other Vital Strategies activities as needed.

Qualifications and skill set:

- Doctoral degree in public health, or medical degree, with 5 or more years of experience in public health practice; OR Master's degree in public health with 10 or more years of experience in public health practice
- Expertise in quantitative methods
- Experience in government public health practice preferred
- Experience working in low- and middle-income settings required
- Strong oral and written communication skills
- Ability to work independently
- Willingness to travel
- Proficiency in languages in addition to English preferred

How to apply:

Please send CV and a cover letter, including salary expectations, to Dr. Adam Karpati Senior Vice President for Public Health Programs at akarpati@vitalstrategies.org.

Closing date for applications: **July 15, 2017**. Only shortlisted candidates will be contacted.
