**Annex A (if applicable)
Scope of Services**

Project Overview:

Specific Objectives:

The Health Sector Engagement Consultant will support the Cleaner Air and Better Health project and will be responsible for the following:

1. Use routinely collected data and provide insights in the form of reports to a variety of stakeholders
2. Engage and activate health-sector-specific stakeholders and policy stakeholders for clean air action, including information sharing, patient education and policy advocacy. Plan and conduct convenings to facilitate such collaborations in consultation with the internal Vital Strategies India team.
3. Coordinate with National consultant, National Centre for Disease Control (NCDC) and support the State focal point in Environmental health division under State Health Society in formulating training modules for District nodal officers and Hospital nodal officer at Sentinel surveillance sites and will provide technical support to enable implementation of training in the respective states.
4. Work with State focal point for Environmental Health to support health awareness, conduct local health sector assessment of perceptions and needs in co-ordination with the National consultant. Share the data, insights and evaluations in the form of reports, briefs and other shareable material with the relevant teams for further dissemination or analysis.
5. Facilitate study on the perception of air quality and its impacts among health workers and community.
6. Coordinate with district/block level health staff to raise awareness on Air Quality (AQ) and impact on health and organize sessions for the same
7. Support the environmental health team in framing recommendations from the perceptions study, and support NCDC in strengthening existing AQ and health training modules for clinicians, community health officers, and ASHAs.

8. Provide technical assistance to state and local health department in gathering data on AQ impact on health, support integration into dashboards and facilitate training of district nodal officers.
9. Participate in meetings with the State pollution control board, Municipal corporation, tertiary care hospitals (public and private) and other stakeholders as and when required.
10. Support conceptualization, convening, of state level stakeholder workshops, trainings, and awareness generation activities in concurrence with Vital Strategies National Lead.
11. Assist with other Vital Strategies duties and requests as specified by Vital Strategies India.
